

Orion Web Technologies Ltd is a leading developer of software solutions based in the UK with customers and users across Europe, the United States and China. Our software is designed to optimise your logistics resulting in enhanced service levels and lower operational costs.

Orion solutions are used by organisations to ensure they can meet continually evolving service demands with robust innovation and flexibility.

The **Orion Star range** of products comprise logistics software solutions for Manufacturers, Distribution companies, Couriers, Warehousing, Packet and Freight networks, 3PLs / 4PLs. and Field Service/Mobile working.

From the exact status of a single transaction to a complete overview of the logistics process all information is available in real time. Real-time access to business critical information is vital to success in the very competitive world of logistics.

Orion delivers one integrated resource providing you with all the necessary current data to inform your decision making. This approach results in real-time information being constantly available to accurately inform decision makers.

Orion solutions deliver:

- **Lower operational costs** by applying consistent processes that scale across multiple sites and operations
- **Improved service levels** through real time visibility of all relevant data right across the business
- **Much closer working with Partners** through seamless data interchange
- Rapid deployment of new products and services
- Managed reduction of the **Carbon footprint**
