

Orion StarLog is a complete Warehouse and Transportation solution designed for the Logistics Service Provider (LSP) and integrates the functions of Supply, Fulfillment and Partner collaboration with Inventory and Warehouse Management. It is available as part of a complete enterprise solution or as individual modules of capability.

Transportation and logistics services are at the heart of the supply chain, linking manufacturers, distributors, and retailers. Increasingly providers of Contract logistics are being forced to deliver ever improving levels of service within tighter budgets. The demands on Contract logistics include lower inventories, tighter delivery windows, end to end visibility and customer instructions on carrier choice.

The **Orion StarLog** planning tools allow you to evaluate the needs of customers and through its powerful simulation capabilities create the optimal logistics solution.

We provide unique solutions that are flexible and scalable across the entire enterprise providing end to end visibility and include the ability to monitor and control contractors, sub-contractors and partners.

Carrier choice and mode of shipment based on service or shipping rates coupled with the ability to produce Carrier compliant labels and integrated tracking ensures you are able to seamlessly deliver the demands of your customers. With a very comprehensive range of standard reports and the ability to easily export relevant data for inclusion within your existing reporting process we provide the options necessary to fully and accurately report service levels.

Orion StarLog allows you to exploit the full potential of your logistics offering, resulting in happier customers, lower operational costs and improved revenues.
