

Orion StarNet is a solution specifically designed for Pallet and Parcel operators with a focus centered on practical features for labeling, tracking and sorting large volumes of Parcels and/or Pallets. The system fully supports Multi-Hub, Cross-Dock, Hub & Spoke and multi-time zone operations in corporate or franchised environments

Accurate and real-time tracking drives the information flow therefore **StarNet** captures data at each stage of the handling process and is constantly monitoring against the planned routing model highlighting any exceptions immediately.

Orion StarNet provides unique solutions that are flexible and scalable across the entire enterprise providing end to end visibility and control. The ability to monitor and control contractors, sub-contractors and work more closely with business partners is an important feature of **Orion StarNet**.

StarNet features a complete administration and invoicing facility which is capable of managing the most complex customer and partner pricing models.
